## Institutional and Professional Licensure Disclosures for Enrolled and Prospective Students

ECU <u>degree programs</u> satisfy the professional licensure and/or certification requirements in North Carolina and prepare students to sit for these exams. However, requirements in other states may be different.

If you are considering a <u>degree program</u> that *may, would, could* or *potentially* lead to a <u>professional license and/or certification</u>, please note that at this time ECU may or may not be able to advise whether a program meets requirements outside of North Carolina. Prior to enrolling in a <u>degree program</u>, please discuss this important topic with your program of interest.
